**Equity Research** 

### China Household Durables

## Home Furnishing: 1H21 new residential sales area grew 29.4% yoy, completions lifted 27% yoy; we see 2H growth

New housing performed better in June 2021 than in June 2019. New construction starts were stable: 1H21 completions continued to recover. Home furnishings grew well from a low base. In the post-pandemic industry disruption, market concentration is rising and online soft furnishing retail is strong on channel expansion. We favor the late-cycle home retail sector.

#### New residential sales and completions up in 1H21 and we expect 2H growth

1H21 sales area of residential and commercial properties in China was 790.81m sqm, up 29.4% yoy (9.6ppt slower than 5M21) and up 19.5% from 1H19. Monthly rises in sales continued in June, with residential and commercial properties at 193.88m sqm, up 6.7% yoy (4.6ppt slower) and up 11% from June 2019.

#### New property sales in first, second and key third-tier cities increased yoy in June

Commercial properties: 1H21 total transaction area in China's 30 large and medium-sized cities was 99.11m sqm, up 45.01% yoy, 16.62ppt narrower than in 5M21, and up 18.28% from 1H19. By city tier, first-tier transaction area amounted to 22.24m sqm, up 33.03% from 1H19; second-tier was 49.31m sqm, up 24.96% from 1H19; and third-tier cities' transaction area came to 27.56m sqm, down 0.19% from 1H19. Second-hand properties: In June, transaction area in nine major cities was 6.61m sqm, a yoy decrease of 9.97%, up 0.91ppt from May, and a decrease of 1.95% from June 2019. Cumulative 1H21 transaction area of second-hand housing in nine major cities was 39.51 m sqm, up 28.69% yoy, up 5.31% from 1H19.

### Commercial and residential completions rose significantly yoy

In 1H21, residential completions area in China amounted to 262.54m sqm, a yoy increase of 26.95%, and up 14.50% from 1H19. The growth rate of completed residential properties would continue to be verified in the course of 2021. In June, completed residential area was 63.74m, up 63.22% yoy and up 55.67% from June 2019.

In 5M21, cumulative **fully furnished new housing** fell yoy, according to AVC data. Cumulative fully furnished new starts from January to May came to ~886,000, a yoy decrease of 6.3%. In May, 233,000 new fully furnished new housing projects commenced, a decrease of 17.20% yoy. From 2016 to 2018, fully furnished new starts volume increased substantially, so considering the business cycle is 2-3 years, we expect incomes of furnishing material suppliers to grow rapidly from 2020 to 2021.

In 1H21, **furniture** retail sales in China amounted to RMB78.1bn, up 30% yoy, 5.1ppt slower than 5M21 and down 12.9% from 1H19. In June, furniture retail sales amounted to RMB16.1bn, up 13.40% yoy and down 12.6% from June 2019.

**Furnishing materials**: In June 2021, prices of particleboard and medium-density fiberboard rose slightly. While prices of MDI and TDI fell mom, they showed significant yoy increases. **Particleboard:** in 1H21, ASP of 18cm was RMB67.91, up 5.13% yoy, up 5.88% from 1H19. June ASP was RMB70, up 1.97% from May. **Medium-density fiberboard:** in 1H, ASP of 15cm was RMB78.50, up 1.93% yoy, and up 4.50% from 1H19. ASP in June was RMB80.80, up 2.24% from May. **MDI**: in 1H21, ASP was RMB22,093.44 /ton, up 54.71% yoy and 4.28% higher than in 1H19. In June, ASP was RMB19,095.24/ton, down 4.47% from May. **TDI**: ASP in 1H21 was RMB14,669.67/ton, up 37.15% yoy, and up 4.00% from 1H19; in June, ASP was RMB13,497.62/ton, a decrease of 2.91% from May.

### Investment summary and risks

Sales of new housing in June 2021 were significantly better than in June 2019. New construction starts were stable: completions in 1H21 continued to recover. Home furnishings had high growth due to a low base. With the industry disruption in the wake of last year's pandemic effects, the trend of a rising concentration of market leaders is showing. Online soft furnishing retail sales increased significantly and the industry's diversifying channel expansion created opportunities. We are optimistic about the late-cycle home retail sector. We recommend a strategy of high-growth and undervalued stocks: Xilinmen Furniture (603008 CH, BUY); Jason Furniture (Hangzhou) Co (603816 CH, BUY); Man Wah Holdings (1999 HK, BUY); Zbom Home Collection (603801 CH, BUY); Oppein Home Group Inc (603833 CH, BUY); and Suofeiya Home Collection (002572 CH, BUY). Risks include: low demand for redecorations; product deliveries less than expected; rising raw material prices; and exchange rate fluctuations.
